## Full Stack Software Engineer Intern

---

I am a motivated and adaptable software engineering student interested in full-stack development, UI/UX design, and building innovative solutions. I enjoy learning new technologies and consistently deliver tasks on time. I am skilled at problem-solving, managing risks, and taking ownership of projects to ensure successful results.

## PROJECTS

---

### EDWin E-Tuition Platform

[GitHub](#)

*Next.js, Tailwind, Express.js, Sequelize, MySQL, Zoom API*

- Developed an e-tutoring platform connecting students and tutors for live sessions. Designed database schema for user roles and integrated Zoom API for classes and AWS S3 for secure file storage.

### Job Portal Platform

[GitHub](#)

*React, Tailwind, Express.js, MongoDB, JWT, Cloudinary, Docker*

- Built a job portal with user login, role-based access, and email alerts for job seekers. Made it mobile-friendly, used Docker for deployment, and integrated Cloudinary for file uploads.

### Spirit11 - Fantasy Cricket Website

[GitHub](#)

*Next.js Tailwind, MongoDB, Gemini API*

- Built a fantasy cricket website for the Inter University Development Competition, where users can choose players with a Rs. 9 million budget and try to reach the top of the leaderboard. Added an AI chatbot with Gemini API to assist with team picks.

### SchoolX – School Dashboard

[GitHub](#)

*Next.js, Tailwind, TypeScript, Prisma, PostgreSQL, Docker*

- Developed a school management system with a secure admin dashboard. Built the backend using Prisma and PostgreSQL, deployed with Docker, and designed a responsive UI using Next.js and Tailwind CSS.

## StockTrack – Inventory Management System

[GitHub](#)

*React, Spring Boot, MySQL*

- Created an inventory management system with a secure RESTful API (JWT authentication), a user-friendly interface, and reliable MySQL data storage.

## Wasteless – Food Donation App

[GitHub](#)

*Android SDK, Firebase, Google Maps API*

- Developed an Android app connecting food donors with those in need. Added real-time notifications and geolocation for efficient donations.

## EDUCATION

---

### The Open University of Sri Lanka

BSE(Hons) Software Engineering

*Jan 2023 – Dec 2026*

### Hermann Gmeiner School, Piliyandala

G.C.E. (A/L) Examination - Physical Science Stream

*2021*

## CERTIFICATES

---

### Google IT Automation with Python Specialization – Google

[Link](#)

## PROFESSIONAL SKILLS

---

- Programming Languages – JavaScript, TypeScript, Java
- Backend Technologies – Node.js, Express
- Frontend Technologies – HTML5, CSS3, React, Next.js, Redux, Bootstrap, Tailwind, Ant Design
- Databases – MySQL, MongoDB, PostgreSQL
- AWS
- GIT
- TensorFlow
- Linux
- Docker
